Information in this table is the number of days for restricted use.

NC- Not Cleared

Y-Irrigation restrictions

This information is to be used as a general guide for planning aquatic vegetation control measures. Chemicals and mentioned products may change at any time and warrant this information out-of-date. Always read the label of chemicals used and clearly understand the restrictions. Never apply chemicals in a manner not recommended by the manufacturer. This information was gathered from product label instructions at recommended application rates and conditions.

This is not a comprehensive list of aquatic pesticides and listing should not be construed as a recommended product by Clermont SWCD, but a guide of common pesticides available in our area. It is up to the individual to determine the best means of treatment for their situation.
